

ELEMENTARY LEPT

2026 REVIEWER

General Education + Professional Education

Aligned to the current PRC Enhanced Table of Specifications (2025)
and the September 2026 Elementary LEPT structure

Designed for review, not prediction

This reviewer organizes the official PRC scope into practical study notes and original LET-style questions. PRC does not publish the actual examination questions in advance.

Use this reviewer with timed drills, error logs, and the official PRC TOS.

1. Exam Blueprint and How to Use This Reviewer

Current ordinary BEd structure

General Education: 150 items, 40% of the rating. Professional Education: 150 items, 60% of the rating.
Ordinary BEd examinees do not take a separate specialization paper.

Component	Items	Rating Weight	Recommended Study Share
General Education	150	40%	About 40%
Professional Education	150	60%	About 60%

General Education subject allocation (current TOS):

- 10 subjects, each at 10% of the GenEd paper (15 items each): English, Filipino, Philippine History, Rizal, Contemporary World, Art Appreciation, Science and Technology, Mathematics, Ethics, and Understanding the Self.

Professional Education allocation:

- Teaching Profession - 15% / 23 items
- Curriculum, Methods/Strategies, and Educational Technology - 30% / 45 items
- Child and Adolescent Learners and Learning Principles - 20% / 30 items
- Assessment of Learning - 15% / 22 items
- Field Study and Teaching Internship - 20% / 30 items

Study rule

Do not review ProfEd as a list of definitions only. The current TOS emphasizes application. Practice deciding the BEST teacher action in realistic classroom situations.

A simple review cycle

1. Read the high-yield notes for one topic.
2. Close the reviewer and recall the key ideas without looking.
3. Answer the mini-drill questions.
4. Write every mistake in an error log: topic, wrong idea, correct rule, and why.
5. Re-answer missed questions after 24-48 hours.

2. General Education Reviewer

GenEd target

All ten GenEd subjects are equally represented in the current TOS: 15 items each. Give extra time to your weakest subjects, not to outdated weighting charts.

2.1 Purposive Communication in English

Focus: grammar, comprehension, purpose, audience, academic and professional communication.

High-yield notes

- Subject-verb agreement: the verb agrees with the true subject, not with a nearby noun. Example: “The list of learners is on the table.”
- Pronoun agreement: pronouns should clearly match their antecedent in number and meaning.
- Modifiers should be placed close to the word they modify. Avoid dangling or misplaced modifiers.
- Parallelism: items in a series should use the same grammatical form.
- Use context clues, tone, purpose, and evidence when answering reading-comprehension questions.
- In formal communication, choose language appropriate to the audience, purpose, and situation. Clarity is usually better than unnecessary complexity.
- When summarizing, keep the main idea and essential supporting points without adding new opinions.

Quick memory aid

Agreement, clarity, purpose, evidence: these four ideas solve many English items.

Common LET trap

A grammatically correct sentence may still be the wrong answer if its tone or register is inappropriate for the situation.

Mini drill

Which sentence is grammatically correct?

- A. Each of the teachers have submitted the report.
- B. Each of the teachers has submitted the report.
- C. Each of the teachers were submitting the report.
- D. Each of the teachers are submitting the report.

Answer: B - “Each” is singular, so it takes “has.”

A school head asks for a concise written update on a project. Which response is most appropriate?

- A. A long narrative containing every minor detail
- B. A brief factual summary with status, key issue, and next action
- C. An informal message using slang
- D. A message containing only personal opinions

Answer: B - Professional communication should match the purpose and audience.

The main purpose of an inference question is to ask the reader to:

- A. Repeat a sentence word for word
- B. Use evidence to reach a conclusion not directly stated
- C. Identify only punctuation errors
- D. Count the paragraphs

Answer: B - Inference combines textual evidence with reasoning.

2.2 Malayuning Komunikasyon sa Wikang Filipino

Pokus: wastong gamit ng Filipino, akademikong pagbasa at pagsulat, layunin at mambabasa.

High-yield notes

- Piliin ang wika at rehistro ayon sa konteksto: akademiko, propesyonal, pormal, o impormal.
- Mahalaga ang malinaw na organisasyon: pangunahing ideya, pantulong na ideya, ugnayan ng mga talata, at lohikal na daloy.
- Sa pagbubuo, panatilihin ang pinakamahalagang ideya at alisin ang di-kailangang detalye.
- Sa sintesis, pinagsasama at inuugnay ang mahahalagang ideya mula sa dalawa o higit pang sanggunian.
- Kilalanin ang layunin ng iba't ibang sulatin: paglalahad, pangangatwiran, paglalarawan, pagsasalaysay, memorandum, ulat, at iba pa.
- Unawain ang kahulugan ng salita ayon sa konteksto, hindi lamang sa literal na depinisyon.

Quick memory aid

Layunin + mambabasa + konteksto = gabay sa pagpili ng angkop na wika.

Common LET trap

Huwag piliin ang pinakamalalim na salita kung mas malinaw at mas angkop ang mas payak na pahayag.

Mini drill

Alin ang pinakamainam na katangian ng akademikong pagsulat?

- A. Malabo at paligoy-ligoy
- B. Organisado, malinaw, at may batayan
- C. Puro personal na opinyon
- D. Laging gumagamit ng teknikal na salita

Answer: B - Ang akademikong sulatin ay dapat malinaw, lohikal, at may sapat na batayan.

Ano ang pangunahing pagkakaiba ng buod at sintesis?

- A. Walang pagkakaiba
- B. Ang buod ay nagpapahaba; ang sintesis ay nagpapaiikli
- C. Ang sintesis ay nag-uugnay ng ideya mula sa maraming sanggunian
- D. Ang buod ay laging opinyon

Answer: C - Ang sintesis ay nag-uugnay ng impormasyon mula sa higit sa isang sanggunian.

Kung ang mambabasa ay punong-guro at ang layunin ay mag-ulat ng insidente, alin ang angkop?

- A. Pormal at tiyak na ulat
- B. Birong mensahe
- C. Malabong salaysay
- D. Puro emosyonal na pahayag

Answer: A - Dapat pormal, malinaw, at batay sa pangyayari ang ulat.

2.3 Readings in Philippine History and Society

Focus: chronology, primary sources, cause-and-effect, and social transformation.

High-yield notes

- Primary source: created during or close to the event by a participant, witness, or institution directly involved. Secondary source: later interpretation or analysis.
- Always evaluate a source by author, purpose, audience, context, and possible bias.
- Know the broad sequence: precolonial societies -> Spanish colonial period -> reform and revolution -> American period -> Japanese occupation -> independence and postwar developments.
- Distinguish cause, trigger, and consequence. Historical events usually have multiple causes.
- The strongest historical answer is usually the one supported by evidence and context, not the most dramatic statement.
- Constitutions and major political transitions should be understood by their historical context and effect on institutions.

Quick memory aid

Source + context + evidence. Ask: Who made it, when, why, and for whom?

Common LET trap

Do not assume a primary source is automatically unbiased or more accurate. It is direct evidence, but still needs evaluation.

Mini drill

Which is a primary source for studying the Philippine Revolution?

- A modern textbook chapter
- A diary written by a participant during the revolution
- A documentary produced in 2025
- A recent encyclopedia article

Answer: B - The diary is a firsthand source from the period.

A historian compares two accounts of the same event. What should be examined first?

- Which account is longer
- Author, context, purpose, and evidence
- Which uses harder vocabulary
- Which has more pictures

Answer: B - Historical evaluation depends on provenance and evidence.

Which statement best reflects historical causation?

- Major events usually have only one cause.
- Historical outcomes often result from interacting political, social, and economic factors.
- Every event is accidental.
- Consequences never influence later events.

Answer: B - Complex historical events normally have multiple interacting causes.

2.4 The Life and Works of Rizal

Focus: Rizal in historical context, major works, reform ideas, and nationalism.

High-yield notes

- Rizal was a key figure of the Propaganda Movement and advocated reforms, education, civic dignity, and representation rather than initially calling for armed revolution.
- Noli Me Tangere exposes social abuses and inequities in colonial society; El Filibusterismo is darker and more political in tone.
- Know the significance of La Liga Filipina, Rizal's exile in Dapitan, his trial, and execution in 1896.
- Review major characters and themes of Noli and Fili at the level of meaning, social criticism, and historical context rather than memorizing every minor detail.
- Rizal's writings contributed to national consciousness and influenced later nationalist and revolutionary developments.
- RA 1425 (Rizal Law) requires the study of Rizal's life, works, and writings, especially Noli and Fili, in schools.

Quick memory aid

Rizal = reform, education, dignity, national consciousness.

Common LET trap

Do not reduce Rizal to "anti-Spain." His critique focused on abuses, inequality, poor governance, and denial of rights.

Mini drill

Which best describes Rizal's dominant reform approach during the Propaganda Movement?

- Immediate armed uprising
- Peaceful reform through education, representation, and civic rights
- Complete political isolation
- Rejection of education

Answer: B - Rizal's reformist approach emphasized civic and political reforms.

Which novel generally presents a darker, more radical political atmosphere?

- Noli Me Tangere
- El Filibusterismo
- Florante at Laura
- Ibong Adarna

Answer: B - El Filibusterismo is darker and more politically charged.

Why are Rizal's works central to Philippine nationalism?

- They discouraged education.
- They helped expose colonial abuses and develop national consciousness.
- They promoted isolation from society.
- They were written only for entertainment.

Answer: B - Their social critique helped shape national consciousness.

2.5 The Contemporary World

Focus: globalization, interdependence, global governance, sustainability, and Philippine participation.

High-yield notes

- Globalization refers to increasing interconnectedness in economic, political, technological, cultural, and social life.
- Globalization creates opportunities and risks: trade, information exchange, jobs, migration, inequality, cultural change, and vulnerability to global shocks.
- Know the basic roles of international organizations such as the United Nations and regional organizations such as ASEAN.
- Sustainable development balances present needs with the ability of future generations to meet theirs.
- Global issues often require multilateral cooperation: climate change, migration, pandemics, conflict, cybersecurity, and transnational crime.
- Analyze issues at both global and local levels. Ask how a global process affects Philippine communities and institutions.

Quick memory aid

Think global, connect local.

Common LET trap

Avoid answers that treat globalization as entirely good or entirely bad. Most items test balanced analysis of benefits, costs, and context.

Mini drill

Which best illustrates globalization?

- A. A barangay using only local information forever
- B. A Philippine business coordinating suppliers and customers across several countries
- C. A family avoiding all technology
- D. A school banning communication

Answer: B - Cross-border economic and communication networks illustrate globalization.

Sustainable development primarily seeks to:

- A. Maximize present consumption regardless of future effects
- B. Balance present development with long-term environmental and social needs
- C. Stop all economic activity
- D. Focus only on technology

Answer: B - Sustainability integrates present and future needs.

Which issue most clearly requires international cooperation?

- A. A classroom seating chart
- B. Climate change
- C. A student's notebook color
- D. A school bell schedule

Answer: B - Climate change crosses national borders and requires collective action.

2.6 Art Appreciation

Focus: elements, principles, form, medium, context, and interpretation.

High-yield notes

- Elements of art commonly include line, shape, form, color, value, texture, and space.
- Principles of design include balance, contrast, emphasis, movement, pattern, rhythm, unity, and proportion.
- Medium is the material or means used to create art; technique is how the artist uses it.
- Interpret art by considering formal qualities, content, cultural/historical context, and possible audience.
- Art appreciation is not only “liking” a work; it involves informed observation, interpretation, and evaluation.
- Philippine art should be understood in relation to local traditions, identity, heritage, and social context.

Quick memory aid

Elements are the ingredients; principles are how the ingredients are organized.

Common LET trap

Do not confuse “medium” with “message.” Oil paint is a medium; a social issue depicted in the painting is part of its content/theme.

Mini drill

Which is an element of art?

- A. Balance
- B. Emphasis
- C. Texture
- D. Unity

Answer: C - Texture is an element; the others are commonly principles.

What does “medium” refer to in visual art?

- A. The artist’s popularity
- B. The material or means used to create the work
- C. The audience size
- D. The price of the work

Answer: B - Medium means the material or means of artistic production.

Which approach gives the strongest interpretation of an artwork?

- A. Judging only whether you personally like it
- B. Considering form, content, and context
- C. Ignoring historical context entirely
- D. Looking only at the frame

Answer: B - Art appreciation relies on informed interpretation.

2.7 Science and Technology

Focus: scientific reasoning, life science, physical science, Earth science, environment, and technology-society relations.

High-yield notes

- Scientific claims should be supported by evidence, repeatable observation, and logical reasoning.
- Independent variable: deliberately changed; dependent variable: measured outcome; controlled variables: kept constant where possible.
- Life science: cells, heredity, ecosystems, food webs, biodiversity, body systems, adaptation, and basic evolution concepts.
- Physical science: matter, states and changes, mixtures, force and motion, energy, heat, light, electricity, and basic chemical change.
- Earth/environmental science: weather, climate, water cycle, plate tectonics, natural hazards, resources, pollution, and conservation.
- Technology should be evaluated by benefits, risks, ethics, access, sustainability, and social impact.

Quick memory aid

Evidence before conclusion.

Common LET trap

Correlation does not automatically prove causation. Look for experimental design and alternative explanations.

Mini drill

In an experiment, the variable measured as the result is the:

- A. Independent variable
- B. Dependent variable
- C. Control group
- D. Constant

Answer: B - The dependent variable is the measured outcome.

Which is the best example of renewable energy?

- A. Coal
- B. Petroleum
- C. Solar energy
- D. Natural gas

Answer: C - Solar energy is replenished naturally.

A claim is scientifically stronger when it is:

- A. Based only on authority
- B. Supported by reproducible evidence
- C. Popular on social media
- D. Impossible to test

Answer: B - Scientific claims depend on testable, reproducible evidence.

2.8 Mathematics

Focus: number sense, fractions, ratio, percent, algebra, geometry, statistics, probability, and word problems.

High-yield notes

- Percent = part / whole x 100. Percent increase/decrease should be based on the original value.
- Ratio and proportion: set up equivalent ratios and solve by scaling or cross-multiplication.
- Fractions: use common denominators for addition/subtraction; multiply numerators and denominators for multiplication; divide by multiplying by the reciprocal.
- Algebra: translate words into expressions/equations and solve systematically.
- Geometry: know perimeter, area, and volume formulas for common figures and solids.
- Statistics: mean = average, median = middle value, mode = most frequent value, range = highest - lowest.
- Probability = favorable outcomes / total possible outcomes when outcomes are equally likely.
- Check units and reasonableness. Many LET math errors come from solving the wrong quantity.

Quick memory aid

Underline what is GIVEN and circle what is ASKED.

Common LET trap

Percent change uses the original value as the denominator, not the new value.

Mini drill

A class has 40 pupils and 30 passed. What percent passed?

- A. 65%
- B. 70%
- C. 75%
- D. 80%

Answer: C - $30/40 \times 100 = 75\%$.

The mean of 6, 8, 10, and 12 is:

- A. 8
- B. 9
- C. 10
- D. 11

Answer: B - $(6+8+10+12)/4 = 9$.

If 3 notebooks cost P90, how much do 5 notebooks cost at the same rate?

- A. P120
- B. P130
- C. P150
- D. P180

Answer: C - $P90/3 = P30$ each; $5 \times P30 = P150$.

2.9 Ethics

Focus: moral reasoning, duties, consequences, virtue, rights, justice, care, and dilemmas.

High-yield notes

- Ethical reasoning asks not only what happened, but what ought to be done and why.
- Deontological/duty ethics focuses on duties, rules, and principles.

- Consequentialist/utilitarian reasoning considers outcomes and overall welfare.
- Virtue ethics focuses on character and the kind of person one should become.
- Justice concerns fairness; rights approaches protect legitimate claims and dignity; care ethics emphasizes relationships and responsibility to others.
- In dilemmas, identify stakeholders, duties, consequences, rights, conflicts of interest, and possible harms before choosing an action.
- Good ethical answers usually avoid convenience, favoritism, deception, and unnecessary harm.

Quick memory aid

Ask: duty, consequence, character, fairness, rights, care.

Common LET trap

The “nicest” action is not always the most ethical if it violates fairness, rules, or others’ rights.

Mini drill

Which approach focuses mainly on duties and moral rules?

- A. Utilitarianism
- B. Deontology
- C. Aestheticism
- D. Relativism only

Answer: B - Deontology emphasizes duties and principles.

A teacher gives a favored student a higher grade without evidence. Which ethical principle is most directly violated?

- A. Fairness and justice
- B. Artistic freedom
- C. Efficiency
- D. Tradition

Answer: A - Grades should be based on fair and defensible criteria.

When resolving an ethical dilemma, the best first step is usually to:

- A. Ignore affected people
- B. Identify relevant facts, stakeholders, and competing principles
- C. Choose the easiest option
- D. Ask who is most popular

Answer: B - Sound ethical reasoning begins with facts and stakeholders.

2.10 Understanding the Self

Focus: identity, development, self-concept, culture, self-regulation, resilience, and reflective growth.

High-yield notes

- The self is influenced by biological, psychological, social, cultural, and historical factors.
- Self-concept refers to beliefs about oneself; self-esteem refers to evaluation of one’s worth; self-efficacy refers to belief in one’s ability to perform a task.
- Self-regulation includes goal-setting, monitoring behavior, managing emotions, and adjusting strategies.

- Metacognition means thinking about and regulating one's own thinking and learning.
- Resilience is the capacity to adapt and recover in the face of difficulty; it can be supported by coping skills, relationships, and resources.
- For teachers, reflective practice connects self-understanding with professional growth.

Quick memory aid

Self-concept = who I think I am; self-esteem = how I value myself; self-efficacy = what I believe I can do.

Common LET trap

Do not confuse confidence in a specific task (self-efficacy) with general self-worth (self-esteem).

Mini drill

A student believes, "I can master fractions if I practice." This best illustrates:

- A. Self-efficacy
- B. Self-esteem only
- C. Role conflict
- D. Cultural isolation

Answer: A - Self-efficacy is belief in one's ability to perform a specific task.

Metacognition is best described as:

- A. Memorizing without reflection
- B. Thinking about and managing one's own thinking
- C. Avoiding feedback
- D. Repeating a behavior automatically

Answer: B - Metacognition involves awareness and regulation of cognition.

Which teacher practice best supports reflective growth?

- A. Ignoring feedback
- B. Examining evidence from lessons and adjusting future teaching
- C. Repeating the same lesson regardless of outcomes
- D. Avoiding self-evaluation

Answer: B - Reflection uses evidence to improve practice.

3. Professional Education Reviewer

ProfEd matters more in the final rating

Professional Education contributes 60% of the ordinary BEd LEPT rating. The biggest official block is Curriculum + Methods/Strategies + Educational Technology (45 items).

3.1 Teaching Profession

Foundations, professional standards, inclusion, ethics, teacher roles, and PPST.

High-yield notes

- Key educational philosophies: Essentialism emphasizes core knowledge and disciplined learning; Progressivism emphasizes experience, problem solving, and learner interests; Perennialism emphasizes enduring ideas; Existentialism emphasizes choice and personal meaning; Pragmatism emphasizes learning through experience and usefulness.
- Sociological foundations examine how schooling relates to culture, socialization, equity, institutions, and community.
- Inclusive education aims to provide meaningful participation and access for diverse learners. Accommodation changes how a learner accesses learning; modification changes what is expected to be learned.
- RA 7836 professionalized teaching and established licensure and regulation of the teaching profession.
- The Code of Ethics for Professional Teachers guides conduct toward learners, colleagues, school authorities, parents, community, and the profession.
- PPST has seven domains: Content Knowledge and Pedagogy; Learning Environment; Diversity of Learners; Curriculum and Planning; Assessment and Reporting; Community Linkages and Professional Engagement; Personal Growth and Professional Development.
- Professional judgment prioritizes learner welfare, fairness, confidentiality, competence, and lawful/ethical conduct.

Quick memory aid

PPST 7 domains: Content, Environment, Diversity, Curriculum, Assessment, Community, Growth.

Common LET trap

In “best teacher action” items, eliminate choices that humiliate learners, violate confidentiality, show favoritism, or bypass due process.

Mini drill

A teacher changes the format of a test for a learner with visual impairment without lowering the competency being assessed. This is primarily a:

- Modification
- Accommodation
- Punishment
- Grade inflation

Answer: B - The access method changes, but the expected competency remains the same.

Which PPST domain most directly concerns the use of assessment data and reporting learner progress?

- A. Domain 1
- B. Domain 3
- C. Domain 5
- D. Domain 7

Answer: C - Domain 5 is Assessment and Reporting.

A teacher learns confidential information about a pupil's family. What is the most professional response?

- A. Share it with unrelated colleagues
- B. Post it online
- C. Protect confidentiality and disclose only when professionally or legally necessary
- D. Use it as a classroom example

Answer: C - Teachers have a duty to protect learner privacy and confidentiality.

Which philosophy most strongly supports learning through real-life problem solving?

- A. Progressivism/Pragmatism
- B. Perennialism only
- C. Fatalism
- D. Authoritarianism

Answer: A - Progressivist/pragmatist approaches emphasize experience and problem solving.

A teacher regularly studies evidence from practice and attends relevant training. This most directly reflects:

- A. Professional growth
- B. Grade manipulation
- C. Hidden curriculum only
- D. Punitive discipline

Answer: A - Continuous learning is part of professional development.

3.2 Curriculum, Methods/Strategies, and Educational Technology

The largest ProfEd block. Focus on alignment, lesson design, teaching strategies, literacy, ICT, and classroom management.

High-yield notes

- Curriculum alignment means learning outcomes, content, instruction, activities, and assessment point toward the same intended competencies.
- Tyler's classic curriculum logic asks: What purposes? What learning experiences? How organized? How evaluated? Taba is often described as a more teacher-involved, inductive approach to curriculum development.
- Learner-centered teaching gives students meaningful cognitive work; it does not mean the teacher has no structure or guidance.
- Direct instruction is appropriate for explicit modeling and foundational procedures; inquiry/problem/project-based approaches are useful for investigation, application, and complex tasks.
- Cooperative learning requires meaningful interdependence and individual accountability, not merely placing learners in groups.

- Differentiation can adjust content, process, product, or learning environment based on readiness, interest, and learner profile while preserving essential goals.
- Scaffolding provides temporary support that is gradually removed as competence increases.
- Use technology because it improves access, feedback, engagement, efficiency, or learning - not simply because it is new.
- New literacies in the TOS include multicultural, social, media, financial, cyber/digital, ecological, arts/creativity, and other emerging literacies.
- Good classroom management is preventive and instructional: clear expectations, routines, engaging tasks, consistent responses, and respectful relationships.
- Localization and contextualization connect curriculum to learners' culture, community, and experiences without sacrificing the intended standards.

Quick memory aid

Alignment test: Can the assessment actually measure the stated objective?

Common LET trap

The most “high-tech” option is not automatically the best. Choose the method or tool that best fits the competency, learners, resources, and context.

Mini drill

Objective: “Compare the causes of two historical events.” Which assessment is best aligned?

- A. Copy definitions from the board
- B. Create a comparison chart with evidence
- C. Memorize unrelated dates
- D. Color a picture

Answer: B - The task directly measures comparison using evidence.

A teacher models a math procedure, practices examples with the class, then assigns independent practice. This is closest to:

- A. Direct instruction
- B. Pure discovery only
- C. Unstructured play
- D. No pedagogy

Answer: A - The sequence reflects explicit teaching and guided practice.

Which feature is essential in cooperative learning?

- A. Only group seating
- B. Positive interdependence and individual accountability
- C. One student doing all the work
- D. No clear goal

Answer: B - True cooperative learning requires both shared and individual responsibility.

When is technology use most appropriate?

- A. Whenever it looks impressive
- B. When it supports the learning goal and suits learner needs and context
- C. Only when paper is unavailable

D. When it makes the lesson longer

Answer: B - Technology should serve pedagogy and access.

A teacher gives different reading texts at appropriate difficulty levels but assesses the same essential comprehension skill. This is:

- A. Differentiation
- B. Punishment
- C. Grade inflation
- D. Tracking without purpose

Answer: A - The process/input is adjusted while the essential target remains.

3.3 Child and Adolescent Learners and Learning Principles

Development, learning theories, metacognition, motivation, diversity, and developmentally appropriate practice.

High-yield notes

- Piaget: Sensorimotor (0-2), Preoperational (2-7), Concrete Operational (7-11), Formal Operational (about 12+). Elementary learners are commonly in the concrete operational range, so concrete examples and manipulatives are especially useful.
- Vygotsky: learning is socially mediated; Zone of Proximal Development (ZPD) is what a learner can do with appropriate assistance; scaffolding supports performance within the ZPD.
- Erikson: elementary-age learners are commonly associated with Industry vs. Inferiority; successful experiences build competence.
- Bandura: observational learning/modeling; self-efficacy affects effort, persistence, and performance.
- Behaviorism emphasizes observable behavior and consequences; positive reinforcement increases desired behavior by adding a desirable consequence.
- Constructivism emphasizes active meaning-making using prior knowledge and experience.
- Metacognition includes planning, monitoring, and evaluating one's own learning strategies.
- Intrinsic motivation comes from interest/value in the activity itself; extrinsic motivation comes from external rewards or consequences.
- Diversity includes readiness, strengths, interests, language, disability, socioeconomic background, culture, gender, and prior experiences. Respond with equity, not stereotypes.
- Developmentally appropriate teaching matches tasks and supports to learners' current developmental capacities while still challenging them.

Quick memory aid

Piaget = cognitive stages; Vygotsky = social support/ZPD; Erikson = psychosocial task; Bandura = modeling/self-efficacy.

Common LET trap

Negative reinforcement is not punishment. Negative reinforcement increases a behavior by removing something unpleasant.

Mini drill

A Grade 4 teacher uses fraction tiles before abstract symbols. Which theory is most directly reflected?

- A. Concrete operational learning
- B. Formal operational reasoning only
- C. Classical conditioning only
- D. Moral relativism

Answer: A - Concrete materials support learners in the concrete operational stage.

A pupil solves a task only after guided prompts from the teacher. The task is most likely within the learner's:

- A. ZPD
- B. Fixed intelligence limit
- C. Punishment zone
- D. Sensory threshold

Answer: A - The ZPD includes tasks possible with appropriate support.

A teacher praises a learner immediately after the learner follows a classroom routine, increasing the behavior. This is:

- A. Positive reinforcement
- B. Negative reinforcement
- C. Punishment
- D. Extinction

Answer: A - A desirable consequence is added to increase behavior.

Which activity best develops metacognition?

- A. Asking pupils to explain which strategy they used and whether it worked
- B. Giving answers immediately without reflection
- C. Preventing learners from checking work
- D. Memorizing only

Answer: A - Metacognition involves monitoring and evaluating one's learning process.

A teacher assumes all pupils from one cultural group learn the same way. The main problem is:

- A. Differentiation
- B. Stereotyping
- C. Scaffolding
- D. Formative assessment

Answer: B - Learner diversity should not be reduced to stereotypes.

3.4 Assessment of Learning

Purposes, validity, reliability, test construction, authentic assessment, basic statistics, interpretation, and feedback.

High-yield notes

- Assessment FOR learning is primarily formative and used to improve ongoing teaching and learning. Assessment OF learning summarizes achievement, often at the end. Assessment AS learning emphasizes learner self-monitoring and reflection.
- Validity asks whether an assessment measures what it is intended to measure. Reliability asks whether results are sufficiently consistent.

- Criterion-referenced interpretation compares performance with standards/criteria; norm-referenced interpretation compares performance with a group.
- A Table of Specifications (test blueprint) helps align test items with content areas and cognitive levels.
- Multiple-choice items should have a clear stem, one best answer, plausible distractors, and avoid unnecessary clues or ambiguity.
- Authentic/performance assessment asks learners to demonstrate knowledge and skills in meaningful tasks. Rubrics make criteria explicit.
- Analytic rubrics score separate criteria; holistic rubrics provide an overall judgment.
- Mean is sensitive to extreme scores; median is often more representative when data are highly skewed.
- Feedback should be timely, specific, accurate, respectful, and actionable.
- Assessment data should lead to decisions such as reteaching, enrichment, remediation, or adjustment of instruction.

Quick memory aid

Validity = right target; reliability = consistent result.

Common LET trap

A reliable test can still be invalid. Consistency does not guarantee that the correct competency is being measured.

Mini drill

A teacher gives a short quiz midway through a lesson and adjusts instruction based on the results. This is primarily:

- A. Formative assessment
- B. Summative assessment
- C. Placement only
- D. Norming only

Answer: A - The purpose is to improve ongoing learning.

A test consistently gives similar results but mostly measures reading skill instead of the intended science concept. It is likely:

- A. Reliable but not sufficiently valid
- B. Valid but never reliable
- C. Neither measurable nor scorable
- D. Perfectly aligned

Answer: A - Consistency can exist even when the test measures the wrong construct.

Which is best for assessing an oral presentation competency?

- A. A performance task with a rubric
- B. A spelling-only quiz
- C. A true/false test about unrelated facts
- D. Attendance record

Answer: A - The assessment should directly sample the performance.

Scores are 4, 5, 5, 6, 30. Which measure best represents the typical score?

- A. Mean

- B. Median
- C. Range
- D. Maximum

Answer: B - The extreme score 30 pulls the mean upward; median is more representative.

Which feedback is most useful?

- A. Wrong.
- B. Good job.
- C. Your explanation identifies the cause; add evidence from the text to support it.
- D. You should already know this.

Answer: C - Effective feedback is specific and actionable.

3.5 Field Study, Teaching Internship, and Action Research

Classroom observation, experiential learning, mentoring, portfolios, reflection, and practitioner inquiry.

High-yield notes

- Field study involves systematic observation and analysis of actual teaching-learning contexts, not passive watching only.
- Teaching internship develops planning, instruction, assessment, management, professional conduct, and reflection under supervision/mentoring.
- Observation records should separate evidence from interpretation. Record what happened before explaining what it may mean.
- A professional portfolio should contain selected evidence linked to competencies plus reflection on what the evidence shows.
- Reflective teaching asks what happened, why it happened, what evidence supports the interpretation, and what should change next.
- Action research addresses a specific, manageable problem in one's own educational context through a cycle such as identify problem -> plan intervention -> act -> collect data -> reflect/evaluate -> refine.
- A good action-research question is focused, answerable with available data, ethically appropriate, and directly connected to practice.
- Protect confidentiality and informed participation when collecting classroom data.
- Recommendations should follow the evidence; do not claim more than the data support.

Quick memory aid

Observe -> analyze -> act -> reflect.

Common LET trap

Do not confuse a broad topic with a researchable classroom question. "Reading problems" is broad; "How does repeated reading affect the oral reading fluency of my Grade 4 class over four weeks?" is researchable.

Mini drill

Which observation note is most objective?

- A. The teacher was terrible.
- B. Three pupils raised their hands after the teacher asked the question.
- C. The lesson was boring.

D. The class did not care.

Answer: B - It records observable evidence without judgment.

A portfolio is strongest when it contains:

- A. Every document collected without explanation
- B. Selected evidence linked to competencies with reflection
- C. Only certificates
- D. Only photos

Answer: B - Portfolio evidence should be purposeful and interpreted.

What is the best first step in classroom action research?

- A. Publish conclusions immediately
- B. Identify and define a specific teaching-learning problem
- C. Choose a result you want to prove
- D. Avoid collecting data

Answer: B - Action research begins with a focused problem of practice.

A teacher tries a new vocabulary strategy, collects pre/post evidence, and adjusts the strategy. This is characteristic of:

- A. Action research
- B. Random guessing
- C. Summative ranking only
- D. Historical research only

Answer: A - The teacher investigates and improves local practice systematically.

After observing a weak lesson, the best reflective response is to:

- A. Blame the learners immediately
- B. Examine evidence, identify likely causes, and plan a specific adjustment
- C. Ignore the result
- D. Repeat exactly the same plan

Answer: B - Reflection should lead to evidence-based improvement.

4. High-Yield Memory Sheets

4.1 Learning and Development Theories

Theorist / Concept	Core Idea	LET Clue
Piaget	Cognitive development through stages	Concrete materials for elementary learners; developmental readiness
Vygotsky	Social learning, ZPD, scaffolding	Guided support, peer collaboration, gradual release
Erikson	Psychosocial stages	Industry vs. inferiority for many elementary-age learners
Bandura	Observational learning and self-efficacy	Modeling, imitation, confidence in ability
Skinner	Operant conditioning	Reinforcement and consequences shape behavior
Pavlov	Classical conditioning	Association between stimuli
Bruner	Discovery, representation, scaffolding	Enactive-iconic-symbolic; structured discovery
Ausubel	Meaningful verbal learning	Advance organizers, connect new learning to prior knowledge
Gardner	Multiple intelligences	Different strengths; use varied learning experiences, not fixed labels
Bloom revised taxonomy	Remember, Understand, Apply, Analyze, Evaluate, Create	Match objectives and tasks to cognitive demand

4.2 Assessment at a Glance

Diagnostic: Before or early in instruction; identifies prior knowledge, strengths, and needs.

Formative: During learning; used to improve teaching and learning.

Summative: After a unit/period; summarizes achievement.

Validity: Measures the intended construct or competency.

Reliability: Produces sufficiently consistent results.

Authentic assessment: Meaningful performance or product that applies knowledge and skills.

Analytic rubric: Separate score for each criterion.

Holistic rubric: One overall judgment/score.

Criterion-referenced: Compared with standards or predetermined criteria.

Norm-referenced: Compared with performance of a reference group.

4.3 PPST Seven Domains

6. Content Knowledge and Pedagogy
7. Learning Environment
8. Diversity of Learners
9. Curriculum and Planning
10. Assessment and Reporting
11. Community Linkages and Professional Engagement
12. Personal Growth and Professional Development

Memory phrase

Content - Environment - Diversity - Curriculum - Assessment - Community - Growth.

5. Mixed Practice Test - 60 Items

Answer without looking back at the notes. Suggested time: 60-70 minutes. Mark uncertain items, then review the answer key and rationales.

1. Which sentence uses parallel structure?

- A. The teacher likes reading, to write, and painting.
- B. The teacher likes reading, writing, and painting.
- C. The teacher likes to read, writing, and paints.
- D. The teacher likes reading, to write, and to paint pictures.

2. Which statement is the best summary?

- A. A repetition of every detail
- B. A concise restatement of the main idea and essential points
- C. A personal reaction only
- D. A direct copy of the entire passage

3. Alin ang pinakatumpak na paglalarawan ng sintesis?

- A. Pag-uulit ng isang teksto
- B. Pag-uugnay ng mahahalagang ideya mula sa iba't ibang sanggunian
- C. Pagsulat ng personal na talaarawan
- D. Pagpapahaba ng isang pangungusap

4. Ano ang pinakamahalagang batayan sa pagpili ng rehistro ng wika?

- A. Haba ng mensahe
- B. Layunin, mambabasa, at konteksto
- C. Paboritong salita ng manunulat
- D. Dami ng talata

5. Which source is most clearly primary?

- A. A 2026 article analyzing the 1898 declaration
- B. A photograph taken during a historical event
- C. A modern encyclopedia
- D. A recent textbook

6. When two historical sources disagree, the best approach is to:

- A. Choose the one you prefer
- B. Compare provenance, context, purpose, and evidence
- C. Reject both immediately
- D. Use only the longer source

7. Which best describes Rizal's social critique in Noli Me Tangere?

- A. It ignores colonial society.
- B. It exposes abuses and social inequities.
- C. It is only a science manual.
- D. It is unrelated to nationalism.

8. Rizal's execution in 1896 is historically significant largely because it:

- A. Ended all nationalist activity
- B. Deepened nationalist sentiment and became a symbol of colonial injustice
- C. Caused immediate independence the next day
- D. Had no political effect

9. Which is a likely effect of globalization?

- A. Complete elimination of cross-border interaction
- B. Greater movement of information, goods, capital, and people across borders
- C. No cultural exchange
- D. Permanent isolation of economies

10. ASEAN is best described as:

- A. A Philippine local government unit
- B. A regional organization in Southeast Asia
- C. A private school system
- D. A world court

11. Which is a principle of design?

- A. Line
- B. Texture
- C. Balance
- D. Shape

12. A critic studies how an artwork reflects the society in which it was created. This emphasizes:

- A. Historical and cultural context
- B. Only the frame
- C. Only the price
- D. Only the artist's age

13. Which organelle is commonly called the “powerhouse of the cell”?

- A. Nucleus
- B. Mitochondrion
- C. Cell wall
- D. Ribosome

14. Which process changes liquid water into water vapor?

- A. Condensation
- B. Evaporation
- C. Freezing
- D. Deposition

15. A force that opposes motion between surfaces is:

- A. Gravity only
- B. Friction
- C. Magnetism only
- D. Radiation

16. What is 20% of 350?

- A. 60
- B. 70
- C. 80
- D. 90

17. A rectangle is 8 m long and 5 m wide. Its area is:

- A. 13 m²
- B. 26 m²
- C. 40 m²
- D. 80 m²

18. The median of 2, 3, 7, 9, 20 is:

- A. 3
- B. 7
- C. 8.2
- D. 9

19. Which ethical approach focuses on the consequences of actions?

- A. Consequentialism
- B. Deontology only
- C. Aesthetics
- D. Epistemology

20. A public official awards a contract to a relative despite a clear conflict of interest. Which value is most directly threatened?

- A. Impartiality and fairness
- B. Creativity
- C. Aesthetic appreciation
- D. Speed reading

21. Self-efficacy refers to:

- A. Belief in one's ability to perform a specific task
- B. Overall social status
- C. The number of friends one has
- D. A fixed personality trait only

22. Which action best demonstrates self-regulation?

- A. Setting a goal, monitoring progress, and adjusting strategies
- B. Waiting for others to decide everything
- C. Avoiding feedback
- D. Repeating errors without reflection

23. Which sentence has a misplaced modifier?

- A. After reading the story, Maria answered the questions.
- B. The teacher nearly gave every student ten points.
- C. The class completed the task quietly.
- D. Students who studied passed the quiz.

24. Alin ang pinakamainam na paglalarawan ng buod?

- A. Mahabang kopya ng orihinal
- B. Pinaikling paglalahad ng pangunahing ideya
- C. Personal na opinyon lamang
- D. Listahan ng lahat ng salita

25. Which factor is most useful when evaluating the credibility of a historical document?

- A. Author and context
- B. Font size
- C. Page color
- D. Number of commas

26. Which idea is most associated with sustainable development?

- A. Use all resources immediately
- B. Meet present needs without undermining future generations
- C. Avoid all economic growth
- D. Ignore environmental effects

27. Which combination is correct?

- A. Line-principle; balance-element
- B. Color-element; emphasis-principle
- C. Texture-principle; unity-element
- D. Shape-principle; rhythm-element

28. A controlled experiment is strongest when:

- A. Multiple variables change at once
- B. The tested variable is isolated while other relevant factors are controlled
- C. No measurements are taken
- D. The conclusion is decided first

29. If 4 pencils cost P36, 10 pencils cost:

- A. P72
- B. P80
- C. P90
- D. P100

30. A teacher reflects on personal assumptions before responding to a learner from a different background. This best demonstrates:

- A. Self-awareness
- B. Avoidance
- C. Fixed stereotyping
- D. External control only

31. Which action best reflects inclusive education?

- A. Removing a learner from all class activities
- B. Providing appropriate supports so the learner can participate meaningfully
- C. Giving the learner automatic perfect grades
- D. Ignoring individual needs

32. Which PPST domain addresses learner diversity most directly?

- A. Domain 1
- B. Domain 2
- C. Domain 3
- D. Domain 7

33. A teacher wants pupils to discover patterns in plant growth through observation and data collection. The most appropriate strategy is:

- A. Inquiry-based learning
- B. Pure lecture only
- C. Punishment
- D. Copying without analysis

34. Which lesson is best aligned?

- A. Objective: analyze; task: copy definitions only
- B. Objective: demonstrate; assessment: actual performance with rubric
- C. Objective: compare; assessment: attendance
- D. Objective: create; assessment: true/false recall only

35. Scaffolding should generally be:

- A. Permanent regardless of progress
- B. Gradually reduced as learners gain competence

- C. Used only after failure
- D. Identical for every learner

36. A Grade 5 learner can solve a problem with peer guidance but not yet alone. According to Vygotsky, this suggests the task is:

- A. Outside all learning
- B. Within the ZPD
- C. Below all prior knowledge
- D. A punishment

37. Which is negative reinforcement?

- A. Giving praise after good work
- B. Removing an unpleasant condition when the desired behavior occurs, increasing that behavior
- C. Adding a penalty to reduce behavior
- D. Ignoring a behavior until it stops

38. A learner says, "I failed once, so I can never learn math." Which teacher response best supports self-efficacy?

- A. Agree that ability is fixed
- B. Provide attainable steps, feedback, and evidence of progress
- C. Compare the learner publicly with the top student
- D. Remove all challenging tasks forever

39. Which is assessment FOR learning?

- A. Final quarterly grade
- B. Exit ticket used to plan tomorrow's lesson
- C. Graduation ranking
- D. Final board exam result

40. Which test characteristic concerns consistency?

- A. Validity
- B. Reliability
- C. Authenticity only
- D. Difficulty only

41. A teacher wants to measure collaboration during a group project. Best tool?

- A. Observation checklist/rubric
- B. A spelling test
- C. Attendance only
- D. A random number

42. Which item-writing practice is best?

- A. Use clues that reveal the answer
- B. Make the stem clear and distractors plausible
- C. Use "all of the above" in every item
- D. Make two answers equally correct

43. A teacher's class mean rises after reteaching. The most defensible conclusion is:

- A. Reteaching definitely caused all improvement
- B. The results suggest improvement, but other evidence should also be considered
- C. Every student mastered everything
- D. No analysis is needed

44. Which field-study note is evidence rather than interpretation?

- A. The pupils were lazy.
- B. Five pupils did not submit the activity by the deadline.
- C. The teacher is ineffective.
- D. The lesson was terrible.

45. The main purpose of reflection after teaching is to:

- A. Assign blame
- B. Use evidence to improve future decisions
- C. Avoid changing anything
- D. Justify every choice automatically

46. Which action-research question is most focused?

- A. Why are students bad?
- B. How does a four-week repeated-reading routine affect oral reading fluency in my Grade 4 class?
- C. What is education?
- D. Why is everything difficult?

47. A teacher collects learner data for classroom research. Which principle is essential?

- A. Publicly reveal all names
- B. Protect confidentiality and follow ethical procedures
- C. Change scores to fit expectations
- D. Collect unrelated personal data

48. A teacher selects a video only because it is popular, even though it does not address the objective. What is the main problem?

- A. Poor alignment
- B. Too much validity
- C. Excessive differentiation
- D. Overuse of scaffolding

49. Which teacher behavior best reflects progressivism?

- A. Learners investigate a community problem and propose solutions
- B. Students memorize facts with no context as the only method
- C. Teacher forbids questions
- D. Learning is disconnected from experience

50. Which situation best reflects differentiated instruction?

- A. Every learner receives identical support regardless of need
- B. Teacher varies supports based on readiness while maintaining the essential goal
- C. Different students receive random grades
- D. Learners are permanently labeled by ability

51. A teacher asks students to judge the credibility of two sources and defend their choice. Which Bloom level is most directly emphasized?

- A. Remember
- B. Understand
- C. Evaluate
- D. Copy

52. Which is the best example of formative feedback?

- A. 76%
- B. Wrong
- C. Your claim is clear; now add two pieces of evidence from the passage.

D. See me.

53. A test measures the intended competency but gives highly inconsistent scores. Its major weakness is:

- A. Reliability
- B. Validity only
- C. Authenticity only
- D. Content coverage only

54. Which classroom management approach is most preventive?

- A. Wait for problems, then punish harshly
- B. Teach routines and expectations, keep learners engaged, and respond consistently
- C. Ignore repeated disruption
- D. Change rules daily

55. A teacher uses local community examples to teach a national competency. This is best described as:

- A. Contextualization/localization
- B. Grade inflation
- C. Norm referencing
- D. Extinction

56. Which PPST domain includes community partnerships and professional engagement?

- A. Domain 2
- B. Domain 4
- C. Domain 6
- D. Domain 7

57. Which statement about accommodation and modification is correct?

- A. They are always identical.
- B. Accommodation changes access; modification changes the learning expectation itself.
- C. Accommodation always lowers standards.
- D. Modification never changes content expectations.

58. A learner studies because she enjoys mastering new ideas. This is primarily:

- A. Intrinsic motivation
- B. Extrinsic punishment
- C. Negative reinforcement
- D. Amotivation

59. Which statistic is most affected by an extreme outlier?

- A. Median
- B. Mode
- C. Mean
- D. Rank only

60. The strongest action-research recommendation is one that:

- A. Matches the collected evidence and acknowledges limitations
- B. Makes claims far beyond the data
- C. Ignores results
- D. Was decided before data collection

6. Practice Test Answer Key and Rationales

1. **B** - All three items use gerunds.
2. **B** - A summary condenses the central ideas.
3. **B** - Sintesis combines related ideas from multiple sources.
4. **B** - Register should fit purpose, audience, and context.
5. **B** - A contemporaneous photograph is primary evidence.
6. **B** - Source criticism requires contextual evaluation.
7. **B** - Noli criticizes abuses and inequalities.
8. **B** - His martyrdom strengthened nationalist consciousness.
9. **B** - Globalization increases interconnectedness.
10. **B** - ASEAN is a Southeast Asian regional organization.
11. **C** - Balance is a design principle.
12. **A** - Context is part of informed art interpretation.
13. **B** - Mitochondria produce much of the cell's usable energy.
14. **B** - Evaporation is liquid to gas.
15. **B** - Friction resists relative motion.
16. **B** - $0.20 \times 350 = 70$.
17. **C** - Area = length x width = 40 m^2 .
18. **B** - The middle value is 7.
19. **A** - Consequentialism evaluates outcomes.
20. **A** - Conflicts of interest threaten impartiality.
21. **A** - Self-efficacy is task-specific belief in capability.
22. **A** - Self-regulation includes planning, monitoring, and adjustment.
23. **B** - "Nearly" is positioned ambiguously and changes the intended meaning.
24. **B** - A summary condenses central ideas.
25. **A** - Provenance and context are central to credibility.
26. **B** - This is the core sustainability principle.
27. **B** - Color is an element; emphasis is a principle.
28. **B** - Control helps isolate the effect of the independent variable.
29. **C** - P9 each x 10 = P90.
30. **A** - Reflection on assumptions is self-awareness.
31. **B** - Inclusion focuses on access, participation, and appropriate support.
32. **C** - Domain 3 is Diversity of Learners.
33. **A** - Inquiry fits observation, questioning, and evidence.
34. **B** - Performance directly measures a demonstration objective.
35. **B** - Scaffolds are temporary supports.
36. **B** - The learner can perform with support.
37. **B** - Negative reinforcement removes something unpleasant to increase behavior.
38. **B** - Mastery experiences and constructive feedback build self-efficacy.
39. **B** - It informs ongoing instruction.
40. **B** - Reliability is consistency.

- 41. **A** - Observation/rubric directly measures collaboration.
- 42. **B** - Clear stems and plausible distractors improve item quality.
- 43. **B** - Assessment interpretation should avoid overclaiming causation.
- 44. **B** - It records observable behavior.
- 45. **B** - Reflection supports evidence-based improvement.
- 46. **B** - It specifies intervention, outcome, context, and time.
- 47. **B** - Ethical research protects participants.
- 48. **A** - Instructional media should support the objective.
- 49. **A** - Progressivism emphasizes experience and problem solving.
- 50. **B** - Differentiation responds to learner needs while preserving goals.
- 51. **C** - Judging based on criteria is Evaluate.
- 52. **C** - It is specific and actionable.
- 53. **A** - The issue is inconsistency.
- 54. **B** - Preventive management uses clarity, routines, engagement, and consistency.
- 55. **A** - Local examples connect standards to learners' context.
- 56. **C** - Domain 6 is Community Linkages and Professional Engagement.
- 57. **B** - This is the key distinction.
- 58. **A** - The motivation comes from interest and mastery.
- 59. **C** - The mean is sensitive to extreme values.
- 60. **A** - Recommendations should be evidence-based and bounded by limitations.

7. Final Week Checklist

- ☐ Can explain the 10 GenEd subjects without relying on outdated percentage groupings.
- ☐ Can solve basic percent, ratio, algebra, geometry, statistics, and word problems under time pressure.
- ☐ Can distinguish primary vs. secondary sources and evaluate source credibility.
- ☐ Can explain Rizal's major works and reform ideas in historical context.
- ☐ Can identify elements/principles of art and interpret context.
- ☐ Can explain basic scientific concepts using evidence and cause-effect reasoning.
- ☐ Can distinguish major ethical frameworks and apply them to dilemmas.
- ☐ Can distinguish self-concept, self-esteem, self-efficacy, self-regulation, and metacognition.
- ☐ Can compare Piaget, Vygotsky, Erikson, Bandura, behaviorism, and constructivism.
- ☐ Can identify the seven PPST domains in classroom/professional scenarios.
- ☐ Can align objective -> activity -> assessment.
- ☐ Can choose appropriate teaching strategies and technology based on the competency and learners.
- ☐ Can distinguish accommodation vs. modification and apply inclusive principles.
- ☐ Can distinguish formative/summative/diagnostic assessment, validity/reliability, and analytic/holistic rubrics.
- ☐ Can interpret mean, median, mode, range and basic assessment data.
- ☐ Can distinguish evidence from interpretation in field observations.
- ☐ Can write a focused action-research question and explain an action-research cycle.
- ☐ Has completed at least two timed GenEd and two timed ProfEd simulations.
- ☐ Has an error log and has re-answered previously missed items.
- ☐ Will stop heavy cramming the night before and prioritize sleep, logistics, and calm recall.
